Customer Count By year

Sales by State

Profit by Monthly

1. Key Metrics Overview

Starting with our top KPIs:

💰 We generated €1.93M in sales and €248K in profit, maintaining a healthy 13% profit margin.

👥 Across these four years, we served over 2,300 customers.

2. Sales by Category

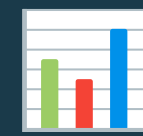

On the right, the doughnut chart shows the sales distribution by category:

 Technology leads with €704K, contributing 37%

 Furniture follows with €622K (32%)

 Office Supplies contributes €602K (31%)

Overall, we see a balanced product mix with Technology slightly ahead.

3. Sales by Sub-Category

The funnel chart breaks this down further:

Our top sub-categories are Phones (€279K), Chairs (€277K), and Storage (€191K).

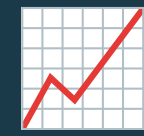

Binders and Tables also perform well, while Labels and Fasteners contribute smaller but steady sales.

4. Geographic Performance

The map highlights our strongest markets across the United States.

- 📍 California leads with €390K, followed by New York (€247K) and Texas (€151K).
- 🌐 We see strong performance along both coasts, with opportunities to grow in central regions.

5. Profit Trends by Year

Looking at yearly profit trends:

- 2021: €50K
- 2022: €62K
- 2023: €82K — our peak year 🏆
- 2024: €55K

Technology consistently delivers the highest profit, while Furniture shows more variability.

6. Monthly Seasonality & 🏆 7. Top Customers

The monthly profit chart shows clear seasonality:

December is our strongest month at nearly €35K, followed by March at €29K.

September to November remain solid, while January and April tend to be slower.

These patterns help with planning inventory and marketing.

7. Top Customers

Our top customers by profit contribution are:

- Tamara Chand — €9K
- Raymond Buch — €6.9K
- Sanjit Chand — €5.8K
- Adrian Barton — €5.2K
- Martinez — €3.9K

Together, these five customers contribute over €30K in profit.

Closing

In summary, this dashboard highlights strong overall performance with nearly €2M in sales, consistent profitability, Technology as our leading category, and clear seasonal trends.

⚙️ The insights are powered by over 8,300 transactions, modeled through pivot tables and visualized using Excel.
